Job introduction / message	[Work contents] There is no work to set up the scaffolds at the construction site or carry them at the construction site because the customer is in the center where the scaffolding material is returned by truck or rented. Scaffolding materials that have been returned, such as maintenance and inspection of scaffolding materials and simple cleaning work accessories, can be maintained by women! ◎ Trading with major companies ◎ We operate the industry's top equipment center with 30 years of history and achievements. Farm Management is a company that manages rental scaffolding equipment. Most construction companies work with equipment, such as scaffolds used at construction sites, because they require space for storage. It is our job to manage and keep the equipment. Every day, various contractors come to load equipment by truck, but our Kawasaki Office is the equipment center that boasts one of the highest number of trucks in the industry. We value "education". We believe that the experience gained from challenging and practicing will have a significant impact on employee growth. Educational know-how created through many years of experience has permeated the employees who support the industry-leading equipment center. Aiming to be the last company to survive in the industry, we will work together to provide better service to our customers! We will work together to improve the quality and speed of our company and employees, always thinking about "think and act" and "reducing waste." https://firm-management.co.jp/index.html
